

Press Release

For immediate release

NetControl™ is controlling Sharp projectors and LCD monitors

QuickLogix's NetControl 1.1 software will be in Las Vegas at the NSCA show

Cross Roads, Texas, USA, March 04, 2004 – Between March 19 – 21, 2004, NetControl™ 1.1 Advanced Package will be presented at the Sharp booth during the NSCA show in Las Vegas, Nevada. NetControl™ is a software tool for audiovisual applications to assist in controlling and maintaining projectors and LCD monitors over an ordinary TCP/IP network.

System integrators, contractors and industry end users can see the latest NetControl™ software release in "action" at the Sharp Electronics Corporation booth (no. 2003) at the NSCA show in Las Vegas. With its latest software update NetControl™ supports many useful control features for the SHARP LCD monitor LC-M3700. NetControl will be integrated in a TCP/IP network to control and manage Sharp's latest projector and LCD monitor products through the Sharp AN-LS1 TCP/IP interface. QuickLogix staff will be present to explain and demonstrate the software to interested customers and clients.

NetControl™ 1.1 software gives you the ability to do remote maintenance from your computer without actually seeing the AV device. It is designed to run in 24/7 applications. NetControl™ 1.1 is designed for use with Microsoft® Windows® 2000 and Microsoft® Windows® XP.

For pricing, please, contact QuickLogix's sales department at: sales@quicklogix.com or 940-440-0654.
